thinking inside and outside the box

RACK IT!

Our shipping container pipe racks provide superior strength while not being bulky and heavy. The pipe racks provide the ability to efficiently and securely store anything that can lay horizontal freeing up valuable floor space. Our racks pay for themselves in labour savings the first time they are used.

- No tools
- No container modifications
- Re-usable
- Powder coated
- Save time and money
- Installs in less than 5 minutes
- Enhance safety

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

#4000C INSTA PIPE RACK

Installation Guide

1

1. Hang pipe racks on container D-Rings.

2

1. Attach the stabilizer T-Bars to the bottom backside of the pipe rack.

3

1. Place desired product on pipe rack.

Stress test results: This pipe rack has no weaknesses with a 2000 lbs. (907 kg) max load rating/per two pipe racks with each arm holding a max weight load of 450 lbs. (204 kg).

**** Requires a minimum of two pipe racks to make a complete unit.**

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off from what's in this book. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
