#6066 3'X3' INSTA WINDOW

Installation Guide

Tools Required For Installation

- PPE – Eye protection, gloves, hearing protection, and ensure not to wear loose fitting clothing
- Step ladder
- Measuring tape
- Marking tool
- Extension cord
- Plasma cutter or angle grinder
- Drill
- Self-Tapping screws
- Driver bit for screws
- Sealant

1

1. Ensure all PPE (Personal Protective Equipment) is worn.
2. Stand the window in the upright position, ensure glass window opens from side to side and moves smoothly within its tracks.
3. Lay the window down and screw on metal flashing to window frame in the desired position ensuring the drip plate flashing is at the top of the window.
4. Depending on if you want the window flush with the outside container wall, or sticking out a little, you will have to adjust the flashing to your liking.

2

1. Measure across the top and down the side of the window and use this measurement to cut the opening in your container wall.
2. Start your measurement at the junction of the container wall and upper frame.
3. Center equally on the two outer corrugations.

3

1. Using a metal cutting tool carefully cut along the lines and remove.

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off from what's in this book. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
